

SHAPING THE LANDSCAPE

AluExcel Special Finishes

Brushed stainless steel-effect anodised aluminium edging

Built on the success of our original AluExcel commercial landscape edging, AluExcel Brushed is given an anodised finish that enables designers to achieve the authentic look of brushed stainless steel at a fraction of the cost.

Stainless steel is a popular material in contemporary landscape and architectural design, but it is expensive. Despite its name, it will also corrode and discolour with unsightly rust stains over time. Like all metals, anodised aluminium will also tarnish but the effect will be much more muted.

If you want to truly take your landscape to the next level, a bronze finish is also available.

Stainless
Steel effect

The image shows a close-up of a metal edging strip with a brushed stainless steel finish. It has a U-shaped profile with a flat top and a perforated bottom edge. A small blue dot is visible on the top surface.

Bronze

The image shows a close-up of a metal edging strip with a bronze finish. It has a U-shaped profile with a flat top and a perforated bottom edge. A small blue dot is visible on the top surface.

Use it with

- Asphalt
- Blocks and pavers
- Imprinted & plain concrete
- Resin-bound & loose gravel
- Wet pour rubber & other safety surfaces

Advantages

- Complement stainless steel landscaping and architectural features at a fraction of the cost
- Create clean curved or straight lines
- Fast, simple installation saves time and money
- Strong, durable alloy won't rust or discolour
- Anodised surface gives added protection against tarnishing and pitting
- Recycled aluminium is lightweight and easy to handle
- Works between all hard/soft surface types

Bespoke Fabrication

Where circles or symmetrical curved shapes are required we recommend utilising our pre-forming service to ensure an accurate result.
